9 results found in the Worldwide database for:  
**gamut AND adjust AND color** in the title or abstract  
(Results are sorted by date of upload in database)

- 1**    **DEVICE AND METHOD FOR ADJUSTING COLOR SPACE VALUE CORRESPONDENCE RELATION, PROGRAM AND RECORDING MEDIUM**  
Inventor: TOMITA MASAMI  
EC:  
Publication info: JP2003030671 - 2003-01-31
- Inventor: CANON I TECH INC  
IPC: G06T11/60; G06T1/00; (+2)
- 2**    **System and method for scan-to- print architecture**  
Inventor: MOORE JOHN A (US); RAHGOZAR M ARMON (US); (+1)  
EC: H04N1/333B; H04N1/60F  
Publication info: US2002109870 - 2002-08-15
- Inventor: XEROX CORP (US)  
IPC: B41J1/00; B41B1/00
- 3**    **COLOR IMAGE PROCESSING METHOD AND APPARATUS UTILIZING THE SAME**  
Inventor: OHTA KEN-ICHI (JP)  
EC: H04N1/60; H04N1/60G  
Publication info: US2001035966 - 2001-11-01
- Inventor:  
IPC: H04N1/60; H04N1/50; (+1)
- 4**    **Constructing device-state tables for inkjet printing**  
Inventor: BOCKMAN FRANCIS E (US); LI GUO (US)  
EC: G06K15/10B; H04N1/52  
Publication info: US6178008 - 2001-01-23
- Inventor: HEWLETT PACKARD CO (US)  
IPC: G06K15/00
- 5**    **Color image processing method and apparatus utilizing the same**  
Inventor: OHTA KEN-ICHI (JP)  
EC: H04N1/60; H04N1/60G  
Publication info: US5801855 - 1998-09-01
- Inventor: CANON KK (JP)  
IPC: H04N1/40
- 6**    **Gamut restriction of color image**  
Inventor: ALDRICH RONALD KEITH (US)  
EC: G06T11/00C  
Publication info: US6154217 - 2000-11-28
- Inventor: SOFTWARE ARCHITECTS INC (US)  
IPC: G06T11/40
- 7**    **System for creating a device specific colour profile**  
Inventor: SCHWARTZ MICHAEL (US)  
EC: H04N1/60F2  
Publication info: EP0785672 - 1997-07-23
- Inventor: EASTMAN KODAK CO (US)  
IPC: H04N1/60
- 8**    **Color image processing method and apparatus utilizing the same**  
Inventor: OHTA KEN-ICHI CANON KABUSHIKI (JP)  
EC: H04N1/60G  
Publication info: EP0675638 - 1995-10-04
- Inventor: CANON KK (JP)  
IPC: H04N1/60
- 9**    **Color processing system**  
Inventor: DALRYMPLE JOHN C (US); WELBORN PATRICK E (US); (+1)  
EC: H04N1/60D3; H04N1/60F; (+1)  
Publication info: US5243414 - 1993-09-07
- Inventor: TEKTRONIX INC (US)  
IPC: H04N1/46

## RESULT LIST

16 results found in the Worldwide database for:

**gamut AND match AND color** in the title or abstract

(Results are sorted by date of upload in database)

- 1 System and method for selecting the best set of devices for rendering color documents**  
Inventor: BALA RAJA (US); SHARMA GAURAV (US); (+1)      Applicant: XEROX CORP (US)  
EC:      IPC: H04N1/50; H04N1/56; (+1)  
Publication info: **US2005036171** - 2005-02-17
- 2 Color converting apparatus and method thereof**  
Inventor: KIM MOON-CHEOL (KR)      Applicant: SAMSUNG ELECTRONICS CO LTD (US)  
EC:      IPC: H04N1/60  
Publication info: **US2004239971** - 2004-12-02
- 3 Color conversion apparatus and method thereof**  
Inventor: SHIN YOON-CHEOL (KR); KIM MOON-CHEOL (KR)      Applicant: SAMSUNG ELECTRONICS CO LTD (US)  
EC: G09G5/06      IPC: G09G5/02  
Publication info: **US2004233218** - 2004-11-25
- 4 COLOR REPRODUCTION SYSTEM**  
Inventor: OHSAWA KENRO (JP); YAMAGUCHI MASAHIRO (JP); (+1)      Applicant: TELECOMM ADVANCEMENT ORG JAPAN (JP); OLYMPUS CORP (JP)  
EC: H04N1/46      IPC: G06T1/00; H04N1/46; (+4)  
Publication info: **EP1450302** - 2004-08-25
- 5 Method and device for determining the color appearance of color overprints**  
Inventor: VAN DE CAPELLE JEAN-PIERRE (US); SUNDERMANN ERIK (BE); (+2)      Applicant:  
EC: G01N33/32      IPC: G06G7/48; G06G7/58; (+2)  
Publication info: **US2002193956** - 2002-12-19
- 6 COLOR CROSS REFERENCE SELECTION SYSTEM AND METHOD**  
Inventor: WOZNIAC TERRY (US); MANGAN JOSEPH (US); (+1)      Applicant: SCITEX DIGITAL PRINTING INC (US)  
EC: H04N1/60G      IPC: G06K15/00; G06K15/02  
Publication info: **CA2367621** - 2002-08-01
- 7 Color correction method and color correction program to obtain desired output image**  
Inventor: DEISHI SATOSHI (JP); HAYAKAWA MASAHIRO (JP); (+4)      Applicant:  
EC: H04N1/60G      IPC: G09G5/02  
Publication info: **US2002000993** - 2002-01-03
- 8 COLOR IMAGE FORMING DEVICE**  
Inventor: KYO GUN      Applicant: RICOH KK  
EC:      IPC: H04N1/60; B41J2/525; (+4)  
Publication info: **JP2002290757** - 2002-10-04
- 9 METHOD FOR EXPRESSING DIGITAL IMAGE IN EXTENDED COLOR REPRODUCTION AREA (GAMUT) ON OUTPUT MEDIUM OF HARD COPY**  
Inventor: BRYANT ROBERT C; SPAULDING KEVIN E; (+1)      Applicant: EASTMAN KODAK CO  
EC: H04N1/60G      IPC: H04N1/60; B41J2/525; (+4)  
Publication info: **JP2001320599** - 2001-11-16
- 10 System and method for scan-to- print architecture**  
Inventor: MOORE JOHN A (US); RAHGOZAR M ARMON (US); (+1)      Applicant: XEROX CORP (US)  
EC: H04N1/333B; H04N1/60F.      IPC: B41J1/00; B41B1/00  
Publication info: **US2002109870** - 2002-08-15

## RESULT LIST

Approximately **165** results found in the Worldwide database for:  
**multi AND primary AND display** in the title or abstract  
(Results are sorted by date of upload in database)

- 1 Multi-primary liquid crystal display**  
Inventor: ROTH SHMUEL (IL); BEN-CHORIN MOSHE (IL); (+1)  
EC:   
Applicant:   
IPC: G02F1/1343; G02F1/1335  
Publication info: **US2005134785** - 2005-06-23
- 2 MULTI-PRIMARY LIQUID CRYSTAL DISPLAY**  
Inventor: ROTH SHMUEL (IL); BEN-CHORIN MOSHE (IL); (+1)  
EC:   
Applicant: GENOA COLOR TECHNOLOGIES LTD (IL); ROTH SHMUEL (IL); (+2)  
IPC: G09G  
Publication info: **WO2005057532** - 2005-06-23
- 3 Color filters and sequencers using color-selective light modulators**  
Inventor: SHARP GARY D (US)  
EC: G02B27/28F; G02F1/01P; (+5)  
Applicant: COLORLINK INC  
IPC: G02F1/1335  
Publication info: **US2005122454** - 2005-06-09
- 4 Coating composition, coating film thereof, antireflection coating, antireflection film, image display, and intermediate product**  
Inventor: YOSHIHARA TOSHIO (JP); SHINOHARA SEIJI (JP); (+2)  
EC:   
Applicant: DAINIPPON PRINTING CO LTD (JP)  
IPC: C09D4/00; C09D5/00; (+3)  
Publication info: **TW225511B** - 2004-12-21
- 5 Optical projection apparatus, transmission type screen, and projection type image display apparatus**  
Inventor: HIRATA KOJI (JP); OGURA NAUYUKI (JP); (+2)  
EC: G02B13/16; G03B21/10; (+2)  
Applicant:

## RESULT LIST

5 results found in the Worldwide database for:

**multi AND primary AND display AND gamut** in the title or abstract

(Results are sorted by date of upload in database)

**1 Color signal processing apparatus and method for reproducing colors on MPD**

Inventor: LEE SANG-JIN (KR); KIM MOON-CHEOL (KR) Applicant: SAMSUNG ELECTRONICS CO LTD (US)

EC:

IPC: G09G5/02

Publication info: **US2004252130** - 2004-12-16

**2 Color conversion apparatus and method thereof**

Inventor: SHIN YOON-CHEOL (KR); KIM MOON-CHEOL (KR) Applicant: SAMSUNG ELECTRONICS CO LTD (US)

EC: G09G5/06

IPC: G09G5/02

Publication info: **US2004233218** - 2004-11-25

**3 Processing colour image signals to derive display control signals for a display device having four or more primaries**

Inventor: KIM MOON-CHEOL (KR)

Applicant: SAMSUNG ELECTRONICS CO LTD (KR)

EC: G09G3/20; G09G5/02; (+2)

IPC: H04N9/64; H04N11/00

Publication info: **GB2390773** - 2004-01-14

**4 DEVICE AND METHOD FOR DESIGNING DISPLAY PRIMARY COLOR**

Inventor: KANAMORI KATSUHIRO

Applicant: MATSUSHITA ELECTRIC IND CO LTD

EC:

IPC: H04N17/02; G06T1/00; (+3)

Publication info: **JP2004166045** - 2004-06-10

**5 ELECTRONIC COLOR CHART DEVICE**

Inventor: ISHII JUNICHIRO; AJITO TAKEYUKI; (+4)

Applicant: KURASHIKI BOSEKI KK

EC:

IPC: H04N1/46; G01J3/52; (+1)

Publication info: **JP2002199231** - 2002-07-12

.....

## RESULT LIST

5 results found in the Worldwide database for:

**gamut AND gain AND color** in the title or abstract

(Results are sorted by date of upload in database)

### 1 Color conversion apparatus and method thereof

Inventor: SHIN YOON-CHEOL (KR); KIM MOON-CHEOL (KR) Applicant: SAMSUNG ELECTRONICS CO LTD (US)

EC: G09G5/06

IPC: G09G5/02

Publication info: **US2004233218** - 2004-11-25

### 2 IMAGE PROCESSING APPARATUS AND METHOD, AND RECORDING MEDIUM

Inventor: TAKAHASHI KOSEI; YAMADA OSAMU Applicant: CANON KK

EC:

IPC: H04N1/46; B41J2/21; (+5)

Publication info: **JP2004064544** - 2004-02-26

### 3 Method of and system for predicting reproduced color image

Inventor: OHTSUKA SHUICHI (JP); YODA AKIRA (JP); (+1) Applicant: FUJI PHOTO FILM CO LTD (JP)

EC: H04N1/60B; H04N1/60F

IPC: G03F3/10

Publication info: **US5748858** - 1998-05-05

### 4 Method of and system for predicting a colour reproduction image

Inventor: OHTSUKA SHUICHI C O FUJI PHOTO (JP); YODA AKIRA C O FUJI PHOTO FILM (JP); (+1) Applicant: FUJI PHOTO FILM CO LTD (JP)

EC: H04N1/60B; H04N1/60F

IPC: H04N1/60

Publication info: **EP0653879** - 1995-05-17

### 5 A technique for generating additional colors in a halftone color image through use of overlaid primary colored halftone dots of varying size

Inventor: BARRY ROBERT VANSELOW (US); AMBRO JOSEPH HAYES (US) Applicant: EASTMAN KODAK CO (US)

EC: H04N1/40F; H04N1/52

IPC: H04N1/46

+WYV +color

## Nothing Found

Your search for **+WYV +color** did not return any results.

You may want to try an [Advanced Search](#) for additional options.

Please review the [Quick Tips](#) below or for more information see the [Search Tips](#).

## Quick Tips

- Enter your search terms in lower case with a space between the terms.

sales offices

You can also enter a full question or concept in plain language.

Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

"museum of natural history" "museum of modern art"

- Narrow your searches by using a + if a search term must appear on a page.

museum +art

- Exclude pages by using a - if a search term must not appear on a page.

museum -Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

museum +"natural history" dinosaur -Chicago

# 1 [Color consistency for digital multi-projector stereo display systems: the HEyeWall and the Digital CAVE](#)

W. Kresse, D. Reiners, C. Knöpfle

May 2003 **Proceedings of the workshop on Virtual environments 2003 EGVE '03**Full text available: [pdf\(16.19 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Digital projectors have a significant advantage over CRTs for IPT setups: brightness. But they also have a number of disadvantages, one of which is color consistency. This problem is exacerbated when using the Infitec method for stereo separation, which in itself has some strong advantages for CAVE and tiled wall setups. In this paper we will describe a method for color and brightness correction of multi-projector display systems. The method itself is used in two new projection systems, which ar ...

## 2 [Introducing scribus](#)

Peter Linnell

November 2003 **Linux Journal**, Volume 2003 Issue 115Full text available: [html\(30.56 KB\)](#) Additional Information: [full citation](#), [abstract](#)

Take desktop publishing off the shrinking list of applications Linux doesn't have, and create press-ready documents with a new GPL program.

## 3 [Color gamut mapping and the printing of digital color images](#)

Maureen C. Stone, William B. Cowan, John C. Beatty

October 1988 **ACM Transactions on Graphics (TOG)**, Volume 7 Issue 4Full text available: [pdf\(6.06 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Principles and techniques useful for calibrated color reproduction are defined. These results are derived from a project to take digital images designed on a variety of different color monitors and accurately reproduce them in a journal using digital offset printing. Most of the images printed were reproduced without access to the image as viewed in its original form; the color specification was derived entirely from calorimetric specification. The techniques described here are not specific ...

## 4 [Perceptual color spaces for computer graphics](#)

Gary W. Meyer, Donald P. Greenberg

July 1980 **ACM SIGGRAPH Computer Graphics , Proceedings of the 7th annual conference on Computer graphics and interactive techniques**, Volume 14 Issue 3Full text available: [pdf\(991.09 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Perceptually uniform color spaces can be a useful tool for solving computer graphics color selection problems. However, before they can be used effectively some basic principles of tristimulus colorimetry must be understood and the color reproduction device on which they

are to be used must be properly adjusted. The Munsell Book of Color and the Optical Society of America (OSA) Uniform Color Scale are two uniform color spaces which provide a useful way of organizing the colors of a digital ...

## 5 Reproducing color images as duotones

Joanna L. Power, Brad S. West, Eric J. Stollnitz, David H. Salesin

August 1996 **Proceedings of the 23rd annual conference on Computer graphics and interactive techniques**

Full text available:  [pdf\(2.74 MB\)](#)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

**Keywords:** Neugebauer model, color printing, color reproduction, duotone, gamut mapping

## 6 Device-directed rendering

Andrew S. Glassner, Kenneth P. Fishkin, David H. Marimont, Maureen C. Stone

January 1995 **ACM Transactions on Graphics (TOG)**, Volume 14 Issue 1

Full text available:  [pdf\(4.67 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Rendering systems can produce images that include the entire range of visible colors. Imaging hardware, however, can reproduce only a subset of these colors: the device gamut. An image can only be correctly displayed if all of its colors lie inside of the gamut of the target device. Current solutions to this problem are either to correct the scene colors by hand, or to apply gamut mapping techniques to the final image. We propose a methodology called device-directed rendering

Full text available:  [pdf\(1.20 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Background: The gamut of a color CRT is defined by its three primary colors, each produced by a phosphor/electron gun combination. Light from the primaries combines additively, so the color gamut is a subset of a three dimensional vector space [1]. With the primaries as

basis vectors normalized to 1.0, the color gamut is a unit cube, known as the RGB color geometry, since the three primaries are usually red, green, and blue. User interaction via RGB is generally thought to be counterin ...

10 Rendering II: Subband encoding of high dynamic range imagery

Greg Ward, Maryann Simmons

August 2004 **Proceedings of the 1st Symposium on Applied perception in graphics and visualization**

Full text available:  [pdf\(1.14 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The transition from traditional 24-bit RGB to high dynamic range (HDR) images is hindered by excessively large file formats with no backwards compatibility. In this paper, we propose a simple approach to HDR encoding that parallels the evolution of color television from its grayscale beginnings. A tone-mapped version of each HDR original is accompanied by restorative information carried in a subband of a standard 24-bit RGB format. This subband contains a compressed *ratio image*, which whe ...

12 Model and representation: the effect of visual feedback on human performance in a color picker interface

Sarah A. Douglas, Arthur E. Kirkpatrick

April 1999 **ACM Transactions on Graphics (TOG)**, Volume 18 Issue 2

Full text available:  [pdf\(516.54 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#), [review](#)

User interfaces for color selection consist of a visible screen representation, an input method, and the underlying conceptual organization of the color model. We report a two-way factorial, between-subjects variable experiment that tested the effect of high and low visual feedback interfaces on speed and accuracy of color matching for RGB and HSV color models. The only significant effect was improved accuracy due to increased visual feedback. Using color groups as a within-subjects variab ...

13 A simple method for improved color printing of monitor images

Michael G. Lamming, Warren L. Rhodes

October 1990 **ACM Transactions on Graphics (TOG)**, Volume 9 Issue 4

Full text available:  [pdf\(6.44 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citing](#), [index terms](#), [review](#)

To print image data optimized for display on a color monitor, the red, green, and blue values that drive the display must be transformed into data that control the amounts of cyan, magenta, yellow, and black on the print. The differences in the way display and print images are produced have important consequences for the transformation. Matching the appearance of the monitor and print images may be impossible, and achieving satisfactory results is complex. A method for obtaining pleasing pr ...

James M. Kasson, Wil Plouffe

October 1992 **ACM Transactions on Graphics (TOG)**, Volume 11 Issue 4

Full text available:  [pdf\(8.77 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Important standards for device-independent color allow many different color encodings. This freedom obliges users of these standards to choose the color space in which to represent their data. A device-independent interchange color space must exhibit an exact mapping to a colorimetric color representation, ability to encode all visible colors, compact representation for given accuracy, and low computational cost for transforms to and from device-dependent spaces. The performance of CIE 1931 ...

Color quantization is a process of choosing a set of K representative colors to approximate the N colors of an image,  $K < N$ , such that the resulting K-color image looks as much like the original N-color image as possible. This is an optimization problem known to be NP-complete in K. However, this paper shows that by ordering the N colors along their principal axis and pa ...

4 [Color gamut matching for tiled display walls](#)

Grant Wallace, Han Chen, Kai Li

May 2003 **Proceedings of the workshop on Virtual environments 2003 EGVE '03**Full text available: [pdf\(678.72 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper presents a non-parametric full-gamut color matching algorithm. Color matching

is important for the seamless appearance of tiled displays. In particular we address the case where the tiled display is composed of different types of projectors or DLP projectors with white enhancement. White enhancement produces a non-additive color space that is difficult to model. We perform our calibration using an inexpensive colorimeter as opposed to a highly accurate spectroradiometer. Our results s ...

5 Perceptual photometric seamlessness in projection-based tiled displays

Aditi Majumder, Rick Stevens

January 2005 **ACM Transactions on Graphics (TOG)**, Volume 24 Issue 1

Full text available:  pdf(326.11 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Arguably, the most vexing problem remaining for multi-projector displays is that of photometric (brightness) seamlessness within and across different projectors. Researchers have strived for <i>strict photometric uniformity</i> that achieves identical response at every pixel of the display. However, this goal typically results in displays with severely compressed dynamic range and poor image quality.

In this article, we show that strict photometric uniformity is not a requireme ...

10 Understanding BGP misconfiguration

Ratul Mahajan, David Wetherall, Tom Anderson

August 2002 **ACM SIGCOMM Computer Communication Review , Proceedings of the 2002 conference on Applications, technologies, architectures, and protocols for computer communications**, Volume 32 Issue 4

Full text available:  [pdf\(312.33 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

It is well-known that simple, accidental BGP configuration errors can disrupt Internet connectivity. Yet little is known about the frequency of misconfiguration or its causes, except for the few spectacular incidents of widespread outages. In this paper, we present the first quantitative study of BGP misconfiguration. Over a three week period, we analyzed routing table advertisements from 23 vantage points across the Internet backbone to detect incidents of misconfiguration. For each incident we ...

11 Pareto-optimal formulations for cost versus colorimetric accuracy trade-offs in printer color management

D. J. Littlewood, P. A. Drakopoulos, G. Subbarayan

April 2002 **ACM Transactions on Graphics (TOG)**, Volume 21 Issue 2

Full text available:  [pdf\(9.84 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Color management for the printing of digital images is a challenging task, due primarily to nonlinear ink-mixing behavior and the presence of redundant solutions for print devices with more than three inks. Algorithms for the conversion of image data to printer-specific format are typically designed to achieve a single predetermined rendering intent, such as colorimetric accuracy. In the present paper we present two CIELAB to CMYK color conversion schemes based on a general Pareto-optimal formul ...

14 Colour, rendering and tone-mapping: Picture perfect RGB rendering using spectral prefiltering and sharp color primaries

Greg Ward, Elena Eydelberg-Vileshin

July 2002 **Proceedings of the 13th Eurographics workshop on Rendering EGRW '02**

Full text available:  pdf(1.01 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Accurate color rendering requires the consideration of many samples over the visible spectrum, and advanced rendering tools developed by the research community offer multispectral sampling towards this goal. However, for practical reasons including efficiency, white balance, and data demands, most commercial rendering packages still employ a naive *RGB* model in their lighting calculations. This results in colors that are often qualitatively different from the correct ones. In this paper, w ...

9 Data base directions: the next steps

John L. Berg

November 1976 **ACM SIGMOD Record , ACM SIGMIS Database**, Volume 8 , 8 Issue 4 , 2

Full text available:  [pdf\(9.95 MB\)](#) Additional Information: [full citation](#), [abstract](#)

What information about data base technology does a manager need to make prudent decisions about using this new technology? To provide this information the National Bureau of Standards and the Association for Computing Machinery established a workshop of approximately 80 experts in five major subject areas. The five subject areas were auditing, evolving technology, government regulations, standards, and user experience. Each area prepared a report contained in these proceedings. The proceedings p ...

**Keywords:** DBMS, auditing, cost/benefit analysis, data base, data base management, government regulation, management objectives, privacy, security, standards, technology assessment, user experience

10 A model of visual adaptation for realistic image synthesis

James A. Ferwerda, Sumanta N. Pattanaik, Peter Shirley, Donald P. Greenberg

August 1996 **Proceedings of the 23rd annual conference on Computer graphics and interactive techniques**

Full text available:  [pdf\(469.77 KB\)](#) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

**Keywords:** adaptation, realistic image synthesis, vision, visual perception

11 Digital publication (panel session): status, opportunities and problems

Dick Phillips, Michael Lesk, Michael Hawley, Andries van Dam, Richard J. Beach

August 1990 **ACM SIGGRAPH 90 Panel Proceedings**

Full text available:  [pdf\(4.39 MB\)](#) Additional Information: [full citation](#), [index terms](#)

12 Adaptively sampled distance fields: a general representation of shape for computer graphics

Sarah F. Frisken, Ronald N. Perry, Alyn P. Rockwood, Thouis R. Jones

July 2000 **Proceedings of the 27th annual conference on Computer graphics and interactive techniques**

Full text available:  [pdf\(476.42 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Adaptively Sampled Distance Fields (ADFs) are a unifying representation of shape that integrate numerous concepts in computer graphics including the representation of geometry and volume data and a broad range of processing operations such as rendering, sculpting, level-of-detail management, surface offsetting, collision detection, and color gamut correction. Its structure is uncomplicated and direct, but is especially effective for quality reconstruction of complex shapes, e.g., artistic a ...

**Keywords:** carving, distance fields, graphics, implicit surfaces, level of detail, rendering, volume modeling, volume rendering

13 A case study of verification, validation, and accreditation for advanced distributed simulation

Ernest H. Page, Bradford S. Canova, John A. Tufarolo

July 1997 **ACM Transactions on Modeling and Computer Simulation (TOMACS)**, Volume 7 Issue 3

Full text available:  [pdf\(501.51 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

The techniques and methodologies for verification and validation of software-based systems

have arguably realized their greatest utility within the context of simulation. Advanced Distributed Simulation (ADS), a major initiative within the defense modeling and simulation community, presents a variety of challenges to the classical approaches. A case study of the development process and concomitant verification and validation activities for the Joint Training Confederation (JTC) is presented ...

**Keywords:** IDEF modeling, advanced distributed simulation, aggregate level simulation protocol, life cycle, validation and accreditation, verification, wargame

14 Seesion VIII - industrial experiences with computer-supported groups: Computer teleconferencing: experience at Hewlett-Packard

Tony Fanning, Bert Raphael

December 1986 **Proceedings of the 1986 ACM conference on Computer-supported cooperative work**

Full text available:  [pdf\(1.48 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

As part of a thrust to improve communication and collaboration among geographically separated groups of engineers, Hewlett-Packard in 1984 investigated computer teleconferencing. Most of that year was devoted to selection, acquisition, and limited pilot use of one such system (CONFER II), which has since been made widely available in the company. Today 1800 HP employees have registered to use the system. Hundreds of people from 15 countries on five continents sign on daily to participate in more ...

15 Information agents for automated browsing

Chanda Dharap, Martin Freeman

November 1996 **Proceedings of the fifth international conference on Information and knowledge management**

Full text available:  [pdf\(1.12 MB\)](#)

Additional Information: [full citation](#), [references](#), [index terms](#)

16 Understanding the limitations of causally and totally ordered communication

David R. Cheriton, Dale Skeen

December 1993 **ACM SIGOPS Operating Systems Review , Proceedings of the fourteenth ACM symposium on Operating systems principles**, Volume 27 Issue 5

Full text available:  [pdf\(1.71 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Causally and totally ordered communication support (CATOCS) has been proposed as important to provide as part of the basic building blocks for constructing reliable distributed systems. In this paper, we identify four major limitations to CATOCS, investigate the applicability of CATOCS to several classes of distributed applications in light of these limitations, and the potential impact of these facilities on communication scalability and robustness. From this investigation, we find limited meri ...

17 History of the TDS medical information system

M. H. Hodge

December 1987 **Proceedings of ACM conference on History of medical informatics**

Full text available:  [pdf\(1.04 MB\)](#)

Additional Information: [full citation](#), [references](#), [index terms](#)

18 Medical information systems: characterization and challenges

Jorge C. G. Ramirez, Lon A. Smith, Lynn L. Peterson

September 1994 **ACM SIGMOD Record**, Volume 23 Issue 3

Full text available:  [pdf\(1.10 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [index terms](#)

This paper examines the characteristics and challenges presented by medical databases and medical information systems. It begins with a survey of medical databases/information systems. This is followed by a list of challenges for database management systems generated by the needs of these systems. It concludes with a look at some systems which

address these challenges. In the context of this background information, the database community is asked to consider whether the results of database ...

19 Curriculum and content: The many facets of HCI

Evelyn P. Rozanski, Anne R. Haake

October 2003 **Proceeding of the 4th conference on Information technology curriculum**

Full text available:  [pdf\(213.99 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

In the last ten years HCI, the study and practice of usability, has emerged as a multidisciplinary, multifaceted field. HCI is an essential knowledge area that pervades the computing field and should be included in every computing professional's education. Computing professionals need to create software, and other technologies, so that users will want to use them and will be able to effectively use them. User advocacy distinguishes the Information Technology discipline from the other computing d ...

**Keywords:** design methods, human-computer interaction, ubiquitous computing, usability, usability engineering

20 Optimization: Optimized color gamuts for tiled displays

Marshall Bern, David Eppstein

June 2003 **Proceedings of the nineteenth annual symposium on Computational geometry**

Full text available:  [pdf\(155.36 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We consider the problem of finding a large color space that can be generated by all units in multi-projector tiled display systems. Viewing the problem geometrically as one of finding a large parallelepiped within the intersection of multiple parallelepipeds, and using colorimetric principles to define a volume-based objective function for comparing feasible solutions, we develop an algorithm for finding the optimal gamut in time  $O(n^3)$ , where  $n$  denotes the number of proj ...

**Keywords:** additive color, color gamuts, gamut mapping, geometric optimization, high-resolution display systems, quasiconvex programming, tiled displays
